

Create a test2.conf and listen on port 82 and to “ location /test/” with the message “ test is successful”.

```
server {  
    listen 82;  
    server_name _;  
  
    location /test/ {  
        index index.html;  
        root /var/www;  
    }  
}
```
